Burkean Economics Cheat Sheet

BrainPower

BrainPower is how humanity thrives, how a country thrives, a state thrives, how each of us – individually – thrive.

Total BrainPower measures the health & wealth of an economy.

- (Brains) x (Power) = BrainPower
- BrainPower is denominated in S\$ – SmartDollars.

Left, Right & Center

Each graph compares three scenarios: Left, Right & Center.

- Left is C25 on the Burkean Gridiron, i.e., an energy economy that's 75% centrally controlled, aka Strong cCon.
- Center is midfield on the Burkean Gridiron, i.e., an energy economy that's 50% centrally controlled, aka Moderate cCon.
- Right is D25 on the Burkean Gridiron, i.e., an energy economy that's merely 25% centrally controlled, aka Moderate dCon.

Burkean Classes

The four Burkean Classes have no truck with heritage or identity, instead are based on human nature. They model how real people act and interact.

- Electrons: Individuals & Families (measured by Households)
- GovNukes: Governmental agencies
- Providers: Businesses, schools, hospitals, etc.
- SinSayers: Religions, movements, cults, etc
